

Introduction to JavaScript 12-Feb-2019

Q1.

Click Calculate button to calculate simple interest

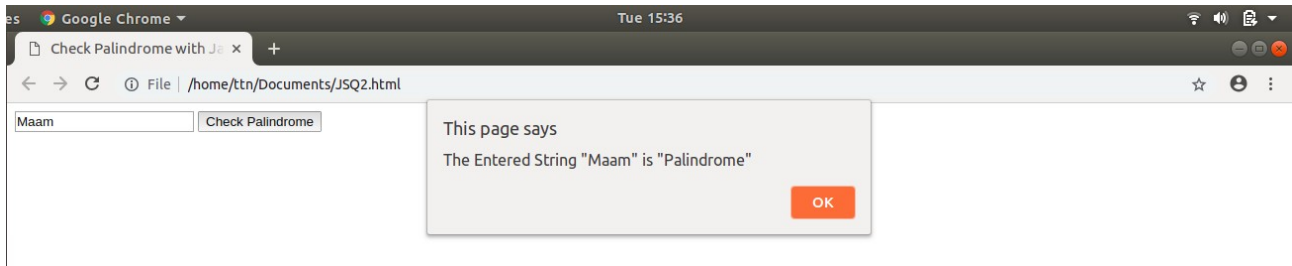

Calculate Simple Interest

Code:

```
<!DOCTYPE html>
<html lang="en">
  <head>
    <meta charset="utf-8">
    <title>Simple Interest</title>
  </head>
  <script type="text/javascript">
    function simpl()
    {
      var p,r,t;
      p=parseFloat(prompt("Please Enter Principle Amount"));
      r=parseFloat(prompt("Please Enter Rate Amount"));
      t=parseFloat(prompt("Please Enter Time(year)"));
      var si=(p*r*t)/100;
      document.write("Simple Interest (calculated anually) is: "+si);
    }
  </script>
  <body>
    <center>
      <h1> Click Calculate button to calculate simple intrest </h1><br>
      <input type="button" value="Calculate Simple Interest" onclick="simpl()"
    />
    </center>
  </body>
</html>
```

Q2.

Code:

```
<html>
<head>
  <title>Check Palindrome with JavaScript</title>
  <script>

    function myFunction()
    {

      var str = document.getElementById('txtbox').value;

      var result = checkPalindrome(str);
      alert('The Entered String "' + str + '" is "' + result + '"');
    }

    function checkPalindrome(str)
    {
      var originalStr;

      str = str.toLowerCase();

      originalStr = str;

      str = str.split("");
      str = str.reverse();
      str = str.join("");
```

```

var reverseStr = str;

    if(originalStr == reverseStr){
        return 'Palindrome';
    }else{
        return 'Not Palindrome';
    }
}
</script>
</head>
<body>
    <form method="get">

        <input type="text" id="txtbox" placeholder="Enter String" />
        <input type="button" onclick="myFunction()" value="Check
Palindrome" />
    </form>
</body>
</html>

```

Q3.

Area of circle

Radius:

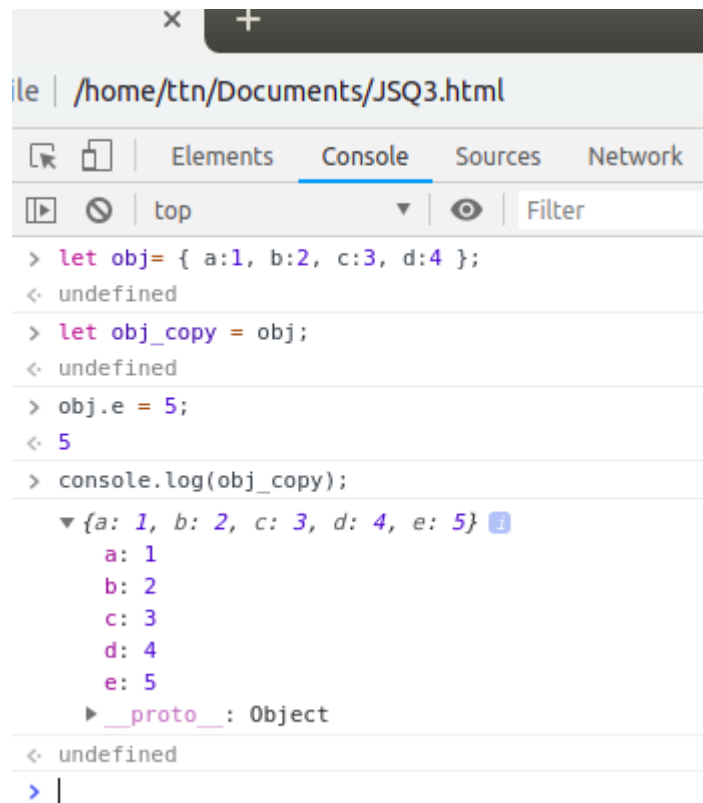

Area of Circle:

Code:

```
<!DOCTYPE html>
<html>
<head>
<script>
function ar_of_cir() {
var r = document.getElementById("r").value
var ar=(3.14*r*r)
document.getElementById("ans").value = ar
}
</script>
</head>
<body>
<h1 align="center">
Area of circle</h1>
<hr>
<center>
<form>
<br>
<br>
Radius: <input type="number" id="r"><br>
<br><br>
<br>
<input type="button" value="Calculate" onclick="ar_of_cir()">
<br>
<br><br>
<br>

Area of Circle:
<input type="number" id="ans">
</form>
</center>
</body>
</html>
```

Q4.

Code:

<code>let obj= { a:1, b:2, c:3, d:4 };</code>	<code>// Press Enter</code>
<code>let obj_copy = obj;</code>	<code>// Press Enter</code>
<code>obj.e = 5;</code>	<code>// Press Enter</code>
<code>console.log(obj_copy);</code>	<code>// Press Enter</code>

Q5.

List of Employees are:-

Name: Amit Age: 40 Salary: 5500\$ Date of Birth: 01-01-1980

Name: Pritam Age: 25 Salary: 8000\$ Date of Birth: 23-12-1993

Name: Tarun Age: 50 Salary: 4500\$ Date of Birth: 26-02-1970

Name: Tanya Age: 20 Salary: 5000\$ Date of Birth: 05-10-1998

Name: Chet Age: 25 Salary: 2500\$ Date of Birth: 18-05-1993

Name: Prem Age: 25 Salary: 380\$ Date of Birth: 14-11-1993

Employee(s) having salary more than 5000\$:-

Amit
Pritam

Employee(s) grouped by age:-

Amit is older
Tarun is older

Pritam is younger
Tanya is younger
Chet is younger
Prem is younger

Employee(s) having salary less than 1000\$ and age greater than 20yrs :-

Prem

AND now their salaries are incremented by 5 times:-

After increment salary of Prem is 1520\$

Code:

```
<html>
<head>
```

```
<script>
(function() {
  'use strict';
  var Employee=[{name:"Amit",age:40,salary:5500,dob:"01-01-1980"},
  {name:"Pritam",age:25,salary:8000,dob:"23-12-1993"},
  {name:"Tarun",age:50,salary:4500,dob:"26-02-1970"},
  {name:"Tanya",age:20,salary:5000,dob:"05-10-1998"},
  {name:"Chet",age:25,salary:2500,dob:"18-05-1993"},
  {name:"Prem",age:25,salary:380,dob:"14-11-1993"}];
```

```
document.write("<br> List of Employees are:- <br><hr>")
  for(var emp in Employee)
    document.write("Name: "+Employee[emp].name+" Age:
"+Employee[emp].age+" Salary: "+Employee[emp].salary+ "$" + " Date of
Birth: "+Employee[emp].dob+"<br><br>");
    document.write(" <br><br>Employee(s) having salary more than 5000$:-
<br><hr>");
    for(var emp in Employee)
      {if((Employee[emp].salary)>5000)
        document.write(Employee[emp].name + "<br>");
      }

    document.write("<br><br>Employee(s) grouped by age:- ");
    document.write("<hr>");
    for(var emp in Employee)
      {if((Employee[emp].age)>35)
        document.write(Employee[emp].name+" is older <br>");
      }
    document.write("<hr>");
    for(var emp in Employee)
      {if((Employee[emp].age)<=35)
        document.write(Employee[emp].name+" is younger <br>");
      }
    document.write("<br><br>Employee(s) having salary less than 1000$ and
age greater than 20yrs :- <br><hr>");
    for(var emp in Employee)
      {if((Employee[emp].age)>20 && (Employee[emp].salary)<1000 )
        {document.write(Employee[emp].name+"<br><br>");
document.write("<br>AND now their salaries are incremented by 5 times:-
<br><hr>")
        Employee[emp].salary=Employee[emp].salary*4;
        document.write("After increment salary of " + Employee[emp].name + " is "
+ Employee[emp].salary + "$");
```

```
}  
  }  
}  
()  
);  
</script>  
</head>  
</body>
```
